

# T13 24 Hour Mechanical Plug-in Timer

1. Holding the timer, with the dial facing you, firmly depress the black segments that surround the dial to your required on and off settings. For instance if you require the timer programme to run from 6 am to 8 am, firmly depress every black segment between these two points. Each segment is worth 15 minutes.
2. Set the time of day by turning the dial clockwise until the correct time is in line with the arrow mark on the dial.
3. Plug the timer into the socket. Plug the appliance into the timer and switch on at the socket and the appliance.
4. Override switch. Your appliance can be turned on manually by using the override switch on the side of the unit. When the switch is pushed upwards, the  is exposed and the appliance will be permanently on. When the switch is pushed downwards, the  symbol is exposed and the timer will operate to the set programme.
5. The programme will be repeated each day if the timer is left plugged in.

**IMPORTANT  
FOR YOUR OWN PROTECTION. WARNING**

Do not open casing.  
No user-serviceable parts within.  
Do not allow children to tamper  
with electrical devices

Do not use timer with open element heaters or  
appliances that are not to be left unattended.
